

ULTIMATE ONE

SINGLE ENGINE DEICER

Glass Control Panel
One Button Start, Self-Diagnostics,
Telemetry Ready

Hydro-Static Deicing Drive
Low engine RPM

Reduced Time and labor for
Preventative Maintenance,
All Filters in one location.
All electrical boxes in one location
All accessible from ground level

Changed From The Inside Out

One Engine, Reduced Fuel Usage, Lower Maintenance Costs, Higher Reliability

While the U1 looks exactly like the Deicers produced by Global for the last 30 years, the internal design and components are completely new. We've integrated new products and technologies to eliminate the need for an auxiliary engine. This design reduces fuel consumption and reduces annual maintenance while increasing reliability.

The U1 deicer is available with all Global options and configurations;
Single Operator, Premium Blend, AirPlus and XR.
